

# CONSTRUCTION MANAGEMENT SOFTWARE

## **ABOUT NIVEOSYS**

Niveosys Technologies Pvt. Ltd is a leading software company having its branches in Mysore and Calicut (Kozhikode) offering customized business solutions and a broad range of IT based services. You can rely on us for developing immaculate and innovative software for your organization. Our development team contains experienced team members who are fully committed in their profession by keeping up the standard and deadline given for the development of the application. What makes us unique is our client collaborative approach followed in each project. We assist our clients to determine their requirements through continuous interaction with them. We have operations in India, middle east and USA.

# **ABOUT CONSTRUCTION MANAGEMENT SOFTWARE**

This software includes project costing and financial management solution designed to fit with the way you do business. It is capable of estimating all job costs and managing revenues, as well as effectively carrying out complete financial reporting in a single solution.

# **CONSTRUCTION MANAGEMENT SOFTWARE MODULES**

- Architecture Module
- Sales Module
- Purchase and Stores Module
- Engineering Module

#### **Architecture Module**

This module is the foundation to all other modules in the application to take care of the project creation process, area specification of the project along with the development of project site view.

#### **Sales Module**

The sales module contains records of each and every action of the sales representative for effecting individual sales along with customer feedback. Pre-sales details are also included in this.

#### **Purchase & Stores Modules**

Purchase & Stores Module is tightly integrated with Inventory, Payments and Legal modules. This module helps purchase managers and store managers to easily access the required information.

### **Engineering Module**

This is a construction project management tool to monitor and control project data, evaluate projects and enable design-to-cost engineering to optimize construction costs. This module is integrated with accounting, architecture, and sales modules
